

The Workshop Team

Mark is Professor of Earth Science at University College, London, and is a leading scientist with particular expertise in global and regional climatic change.

He appears on TV and radio, and is the author of numerous

articles, papers and books, including **How to Save Our Planet: The Facts** (Penguin2021)

Megan and Patrick are the co-directors of Climate Psychologists, an independent organisation providing individual therapeutic support and wider consultation regarding the mental health implications of climate change. They are the authors of **Turn the Tide on Climate Anxiety**, due out later this year with Jessica Kingsley Publishing

CALL is a 'not for profit' independent group interested in promoting lifelong learning in Cambridgeshire.

Understanding and coping with the climate crisis

The importance of climate change.

Climate change is the most critical and controversial issue facing the world in the twenty-first century. Everyone agrees we must keep global warming to under 2°C and under 1.5°C if possible. But how can we do this while dealing with the other great challenges of our age: global poverty, population growth, environmental degradation and global security. Climate change seems too big to deal with but Prof. Maslin shows us how we can save our Planet from climate change while improving everyone's lives.

Programme

10.00 am Session 1 With Prof. Mark Maslin.

11.00 am Coffee Break

11.30 am Session 2 Dr. Patrick Kennedy-Williams
Megan Kennedy-Woodard.
